Date: January 12, 1999 - Physician: A.C. Epton, MD; 555-343-5555

Julian Smith: Scarlet Fever Age: 6 - MyMedStory™ #012654-72

■ MyMedStory:

→ Prescription: AMOXICILLIN (a-mox-i-SILL-in) + Clavulanate
○ Brand Name: AUGMENTIN®
○ 1 1/2 (one and a half) teaspoon twice a day for 10 days
○ Make sure you remember to "shake it and give it"
→ IMPORTANT:
○ Do not stop the treatment before the full 10 days, even if all symptoms have disappeared. This is VERY IMPORTANT, as other and serious problems (complications) may otherwise develop.
○ In case of an additional or increased rash, hives, breathing difficulties, dizziness,

○ In case of an additional or increased rash, hives, breathing difficulties, dizziness, swelling of the lips, tongue, face or eyes, or any other rapidly evolving difficulty, do contact your doctor **IMMEDIATELY!**

→ contact your drugstore if needed:

 Drugstore

→ **INFORMATION:**

○ Julian actually has a "Group A Beta Hemolytic Streptococci" infection, or "Strep Throat", a common infection in children. Because he has also a typical rash as well, he has in fact a form of "Scarlet Fever". For detailed information from selected sources of medical information, go to [zero-search™](http://zero-search.com)
